

*Ingrid Elbow Crutch* is a result of a team effort of Swedish physical therapists and experts within ergonomic design.

The hand grips, which are ergonomically customized for both the left and right hands may be individually adjusted.

The *Ingrid Elbow Crutch* user's forearm is comfortably supported by an adjustable-length, padded cuff, which further relieves pressure on the elbow.

The crutch is equipped with an adjustable elastic strap over the forearm which, without putting the crutch down, will free the user's hands for day-to-day activities.

Scandinavian design when function is a priority

The final design of Ingrid Cane Holder is made by the internationally renowned designer Håkan Bergkvist, making it an appealing accessory to any cane or crutch.
